
MELEK KALYONCUOĞLU — Frontend Developer

(React Native & React)

PROFILE

I am a frontend developer who builds user-friendly interfaces for web and mobile using modern technologies. On mobile, I develop scalable and high-performance apps with React Native and also have project experience in Flutter. On the web side, I create dynamic and responsive interfaces with React, Next.js, JavaScript/TypeScript, and Tailwind CSS. I work on API integrations, state management, and modular architecture; when needed, I contribute to backend integrations with Node.js at a basic level. Writing clean and maintainable code and ensuring team collaboration are my priorities.
